Message from Mr. Gregor Bauer, Ph.D
President of the German Association of Technical Analysts (VTAD) and
Member of the Board of IFTA

My Dear Japanese friends,

Singapore will be my 10th IFTA conference and I am really getting excited about going there and meeting again all my friends, which I have made during these ten years. But moreover, I'm looking forward to meet many new interesting people and to talk to as much technical analysts as I can to learn about their strategies and ideas. I'd be glad to meet many analysts and traders also from Japan.

Furthermore I am sure that every delegate will profit a great deal from the various lectures given by all these renowned speakers.

I feel honored to be speaker myself at the second power hour, in which we will discuss "Technical Analysis Based Strategies That May Be Successful in the Near Term." The diversity of financial instruments in financial markets continues to grow, so how will Technical Analysis adapt and develop? I am curious about a lively discussion with you all.

I see you in Singapore!

Gregor Bauer, Ph.D
President of the German Association of Technical Analysts (VTAD) and
Member of the Board of IFTA
