NTAA 会員へのメッセージ ※  
2012 年 IFTA シンガポール大会に向けて

**Message from Mr. Ron William, MSTA, CMT**  
**Vice Chairman of Geneva Chapter of the Swiss Association of Market Technicians (SAMT)**  
**President of Middle East & Africa Market Association (MEA-MA)**

Dear my friends in Japan,

I wish to share positive happy greetings from Switzerland where I now live and work as a humble student of the market.

Over the last 13 years I have worked with leading financial institutions around the world as a Technical Analyst, developing key research and strategies.

If I have been successful so far, it is by standing on the shoulders of Giants. That means having the honour to learn from wise mentors and colleagues.

In 2008 I had the great honour of being invited by the NTAA to share a presentation on “The Secret nature of Market Geometry”. I was very impressed by our intellectual discussions and the beauty of Japan.

This time I will be presenting some of my strategies about “Market timing, using Japanese Candlesticks in Volatile Markets” which will primarily focus on the importance of cycles, geometry and DeMark(R) Indicators.

I look forward to the IFTA conference in Singapore and celebrating our 25 year anniversary.

Please join myself and several others in being part of the global community of thinkers. Knowledge is a virtuous circle of progress and harmony in life.

I hope to meet many of my Japanese friends at this year's IFTA conference.

“Enlightenment Through Realised Knowledge”
